

Using *Atlas of Science Literacy*

AAAS PROJECT 2061 PROFESSIONAL DEVELOPMENT WORKSHOP FOR EDUCATORS

Who should attend?

- K-12 science and mathematics teachers, administrators, and curriculum specialists
- Textbook adoption committee members
- University faculty (sciences, mathematics, education)
- Curriculum and assessment developers
- Educators and staff at informal science institutions

About *Atlas of Science Literacy*.

Atlas is an exciting two-volume resource that brings together nearly 100 strand maps developed by Project 2061 of the **American Association for the Advancement of Science** and co-published with the **National Science Teachers Association**. Strand maps present conceptual connections among the ideas and skills that all students need to learn in science, mathematics, and technology. Maps graphically display how students might progress in their understanding of topics such as gravity, natural selection, weather and climate, and statistical reasoning from kindergarten through grade 12.

About the *Atlas* workshop.

This three-day workshop will give you a new perspective on standards-based reform and a new tool for the work that lies ahead. You will use *Atlas* and other Project 2061 resources to enhance your understanding of science

literacy and to improve your curriculum, instruction, and assessment. The workshop will help you to:

- **Understand the *Atlas* Maps** To gain insights into the nature and purpose of maps, you will explore the "backmapping" process used to create the maps by trying it yourself on selected topics.
- **Clarify Standards** To shed light on local, state, and national standards, you will use *Atlas* maps to see how the connections among ideas and skills are a key to helping your students learn and a critical part of science literacy.
- **Change Classroom Practice** To understand how students progress in their mastery of ideas and skills, you will use *Atlas* maps to decide whether an instructional activity or assessment takes account of what your students already know and where they are going next.
- **Improve Curriculum** To design a more coherent and effective curriculum, you will learn how to use maps to think through the scope, sequence, and coordination of learning goals and to select materials, teaching strategies, and assessments that are well aligned to them.

When and where?

October 6-8, 2010
Columbia Public School
Vandiver Building, Conference Room C
555 Vandiver Drive
Columbia, MO 65202

How to register?

Use the registration form on the reverse side.

For more details visit:

www.project2061.org/workshops

With a mission of "Advancing Science, Serving Society," AAAS is the world's largest general science organization, publisher of the peer-reviewed journal *Science*, and an authoritative source that bridges gaps among scientists, policymakers, and the public. Project 2061—the education reform initiative founded by AAAS in 1985 to help all students become literate in science, mathematics, and technology—created the nation's first set of K-12 science learning goals, *Benchmarks for Science Literacy*, in 1993.

Workshop Location:

University of Missouri/Science Education Center workshop will be held at:
 Columbia Public School Vandiver Building
 Conference Room C
 555 Vandiver Drive
 Columbia, MO 65202

Workshop date:

October 6-8, 2010

Return this form to:

AAAS Project 2061
 Professional Development Programs
 ATTN: Cheryl Latson
 1200 New York Avenue, NW
 Washington, DC 20005
 Phone: 202-326-6632
 Toll-Free: 888-PDP-2061
 FAX: 202-842-5196

Accommodations:

All workshop participants are responsible for the booking and payment (or cancellation) of their own accommodations.

You may find www.hotels.com a useful tool for selecting your Columbia, MO lodging.

Cancellation Policy:

Registration fees are refundable if cancellations are received 15 days prior to the workshop. A \$50 processing fee will be charged. After the cancellation deadline, no refunds will be given. Participant substitutions may be made. While cancellations by AAAS Project 2061 are rare, in the event a workshop is cancelled only registration and book fees (in full) will be reimbursed. Participants who have incurred travel or other related costs will be responsible for those expenses.
